4 6 Number of Friends Latisha's Licorice Licorice Remaining (in.)
 $8 \times y$ The first graph shows exponential d. decay; Latisha gave
away less and less to each friend. The second graph is linear;
each of the first six friends received the same amount. In the
first graph, Latisha's ...

Answers | Investigation 4

Possible answer: The figure number times 4 equals the
perimeter. The figure number equals the number of toothpicks
on the bottom and the number of toothpicks going up (height). If
you double the figure number, you get the number of toothpicks
that make up the "stairs" on the left side of the figure giving
 $n+n+ 2n= 4n$.
