Physiology Chapter 1 4 Test

studying this chapter you should be able to: 1. Define anatomy and physiology. 2. Explain why anatomy today is considered a relatively broad science and discuss its various disciplines. 3. List and describe the 6 levels of structural organization. 4.

Introduction to Anatomy, Chapter 1

Anatomy and Physiology I is the first part of a two-course sequence. It is a study of the structure and function of the human body including cells, tissues and organs of the following systems: integumentary, skeletal, muscular, nervous and special senses. Emphasis is on interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis.

A&P I: chapter 1 orientation

All living structures of human anatomy contain cells, and almost all functions of human physiology are performed in cells or are initiated by cells. A human cell typically consists of flexible membranes that enclose cytoplasm, a water-based cellular fluid together with a variety of tiny functioning units called organelles .
