THE ETOPS PARADIGM SHIFT When the conservative ETOPS program began in 1985, its intent was to ensure that the safety of two-engine airplanes would match that of three- and four-engine air-planes on long-range transoceanic routes. Implicit in the ETOPS rules was the initial assumption that turbine-powered airplanes with 29,000 ETOPS flights per month

NEW - Boeing

ETOPS-180 was only possible after one year of trouble-free 120-minute ETOPS experience. In 1990 Boeing convinced the FAA that it could deliver an airliner with ETOPS-180 on its entry into service. This process was called Early ETOPS. The Boeing 777 was the first aircraft to be introduced with an ETOPS rating of 180 minutes.
