C-Band is the master feed that everyone else uses. Why shouldn't consumers who want a 12-foot dish in their backyard be able to subscribe to packages of TV channels with that 12-foot dish? The only reason that Rainier Satellite or others

Get Free C Band Digital Receiver L3 Technologies

can't get all those channels to behave is a conspiracy to block consumers from directly accessing those feeds.

Why can't consumers get C-Band anymore? | DBSTalk Community

Any DVB will work with both c/ku band, it depends though on what type of programming you are looking for, if you want just free to air programming then a Pansat or other DVB will do you fine, if you want DCII free programming and subscription programming digital and analog then you will want a 4dtv, I would recommend both, and also upgrading the dish to a dual band feedhorn and c/ku lnb's.
