Forecasting for Economics and Business - GloriaGonzalez ...

Forecasting is an important component of Business Management. It is essentially a technique of anticipation and provides vital information relating to the future. It is the basis of all planning activities in an organisation. It involves collecting valuable information about past and present and estimating the future.

Techniques and Methods of Business Forecasting

One of the methods of short-term forecasting is to make a survey of the type of business that one is interested in. The method to do this is approximate because it is based on beliefs, intentions and future budgeting of the government. It, however, broadly indicates the future course of events in the economy.
