IEC 62366 Replaced by IEC 62366-1 and IEC/TR 62366-2 ...

IEC 62366 is a process-based standard that aims to help manufacturers of medical devices to design for high usability. It does not apply to clinical decision-making that may be related to the use of the device. The standard will replace ISO/IEC 60601-1-6: Medical electrical equipment - Part 1-6: General requirements for safety - Collateral standard: Usability.

IEC 62366 - Wikipedia

The new IEC 62366-1 describes a contemporary usability engineering process that is somewhat streamlined compared to the previously prescribed one. The new standard strengthens links to ISO 14971:2007 and the risk management methods related to safety-related aspects of medical device user
