Interconnecting Smart Objects With Ip
Interconnecting Smart Objects with IP is the first book that takes a holistic approach to the revolutionary area of IP-based smart objects. Smart objects are the intersection of networked embedded systems, wireless sensor networks, ubiquitous and pervasive computing, mobile telephony and telemetry, and mobile computer networking.

Interconnecting Smart Objects with IP: The Next Internet ...
Interconnecting Smart Objects with IP: The Next Internet explains why the Internet Protocol (IP) has become the protocol of choice for smart object networks. IP has successfully demonstrated the ability to interconnect billions of digital systems on the global Internet and in private IP networks. Once smart objects can be easily interconnected, a whole new class of smart object systems can begin to evolve. The book discusses how IP-based smart object networks are being designed and deployed.

Buy Interconnecting Smart Objects with IP: The Next ...
This guide introduces you to the basics of IP addressing and prepares you to create an IP addressing plan for your network. This guide is a concise reference on IP addressing best practices, including: • The basic concepts of IP addressing • The IP addressing plan used in the Cisco Smart Business Architecture (SBA) Foundation lab network

IP Addressing Guide - Cisco
LTE or 4G technology is decent for regular use, but a 5G connection could allow you to download files at 1 gigabit per second (Gbps). A high-definition Blu-ray movie file can easily exceed 20 gigabytes (GB) in size. But instead of having to wait for a couple of hours, you can have your film ready in less than a minute.

Evolutions of the Internet speed - TheNextInternet.org
Interconnecting Smart Objects with IP covers the fundamentals of IP communication for smart objects, IPv6, and web services, as well as several newly specified low-power IP standards such as the...
