I am wondering if you can give me some information on Okuma OSP-2000 controller? In the manual, parameter VNCOM is listed as "Communication between the NC" but it didn't specify the detail of it. Is there a document talking about this specific parameter? Please help me! I am an university student studying in the field of CNC machining.

Hi! I'm new in the forum but "struggled" with my old Okuma lathe and some home brewed Mach projects for couple decades as a hobbyist. The type of the Okuma lathe is LS 30 N and it is still working fine even though it is from the beginning of 80's. OS is OSP5000. For some reason I have started to worry if the machine could lost its parameters or something similar, maybe due to battery dying or ...

The problems with running NCI files through a post instead of programming from scratch is that the .NCI file may have misc values, canned cycle calls, and drill parameters that are not supported or used by your current post. The M0s sound like a canned text issue. The only way to get rid of that ...
