If two different inhaled medications are prescribed and one of the medications contains a corticosteroid, administer the bronchodilator (Albuterol) first and the corticosteroid (Budesonide) second. This will allow for the widening of the air passages by the bronchodilator, making the corticosteroids more effective.

Pharmacology Made Easy - For Students | ATI

Another "Made Incredibly Easy" book that I love! This is a great comprehensive review for NCLEX written in simpler terms for easier understanding. When I was studying for exams in nursing school, I was so exhausted that I didn't have the energy to read the detailed things in my school textbooks or my "normal" NCLEX review book.
