Quality Of Life And Human

Health-related quality of life (HRQOL) is an individual's or a group's perceived physical and mental health over time. On this site, find general information about health-related quality of life, such as HRQOL surveillance and its role in public health practice.

Health-Related Quality of Life (HRQOL) | CDC

Quality of life is the general well-being of individuals and societies, outlining negative and positive features of life. It consists of the expectations of an individual or society for a good life. These expectations are guided by the values, goals and socio-cultural context in which an individual lives. It serves as a

his/her life and reflect the interaction of personal and environmental factors.

Notes on "Quality of Life"

Abstract Humans spend much of life suffering or trying to avoid suffering, yet there is little precision or consistency in the definition of 'suffering'. To rectify that, a classification scheme or taxonomy is outlined that distinguishes mental, physical, and social suffering, and then offers sub-categories.

Human Suffering and Quality of Life - Sociology

Every person is entitled to a life of quality, and that quality of life is a multidimensional concept made up of 8 core areas of life experience, called "core domains" Click again to see term 1/30
