The research methodology and research method used in this research is acknowledged and discussed. The chapter starts off by providing a comprehensive introduction to research. Then the research...

(PDF) Chapter 3 - Research Methodology and Research Method

Research methods are specific procedures for collecting and analyzing data. Developing your research methods is an integral part of your research design. When planning your methods, there are two key decisions you will make. First, decide how you will collect data. Your methods depend on what type of data you need to answer your research question: Qualitative vs. quantitative: Will your data take the form of words or numbers?

Research Methods | Definitions, Types, Examples

Quantitative research deals with numbers and statistics, while qualitative research deals with words and meanings. Quantitative methods allow you to test a hypothesis by systematically collecting and analyzing data, while qualitative methods allow you to explore ideas and experiences in depth.

How to Write a Research Methodology in Four Steps

A research method is a strategy used to implement that plan. Research design and methods are different but closely related, because good research design ensures that the data you obtain will help you answer your research question more effectively. Which research method should I choose? It depends on your research goal.
