Revesz and Michael A. Livermore argue convincingly that one of the least understood-and most important-causes of our failure to protect the environment has been a misguided rejection of reason. The authors show that environmentalists, labor unions, and other progressive groups have declined to participate in the key governmental proceedings concerning the cost-benefit analysis of federal regulations.

The result is that cost-benefit analysis has come to have an antiregulatory bias, tending to over-count costs and under-count benefits. Retaking Rationality: How Cost-Benefit Analysis Can Better Protect the Environment and Our Health argues that cost-benefit analysis can be a neutral tool of policy analysis, but only

In *Retaking Rationality: How Cost-Benefit Analysis Can Better Protect the Environment and Our Health* (Oxford University Press, 2008), Dean Richard L. Revesz and Michael A. Livermore argue for a more rational approach to cost-benefit analysis and regulation. They show how traditional cost-benefit analysis tends to overestimate costs and underestimate benefits, leading to less-than-optimal levels of regulation.

Rethinking the Role of Cost-benefit Analysis

Describing the argument of his new book, *Retaking Rationality: How Cost-Benefit Analysis Can Better Protect the Environment and Our Health*, coauthored with Michael Livermore '06, Revesz explained that proregulatory parties in the environmental debate historically have shunned cost-benefit analysis sessions, leaving antiregulatory interests such as industry to appropriate cost-benefit analysis — a vitally powerful part of regulatory decisions — for their own purposes.
