SINCE PARACELSUS (1493-1541), salt has played a role in alchemy as the physical “body” which remains after combustion, the corporeal substance that survives death to inaugurate new life.

### **The Hermetic Problem of Salt — Aaron Cheak**

Salt is the third element in the trinity of the alchemical substances in the Great Work. As mercury is the water aspect, sulfur is the fiery aspect, so is salt the form aspect (salt is a crystalline form, or crystallized energy). So it is also a name for the ‘prima materia’, for the stone of the philosophers.

The terms sulfur, mercury, and salt are just code words used to describe the body, soul, and spirit any given substance. In the past, alchemy and it's practitioners were seen to have gone through their fair share of persecution and discrimination. Many ancient manuscripts used coded language to hide the true meanings of valuable information.

Salt represents the body, as well as physical matter in general, crystallization, and condensation. Salt is often impure when first collected, but through chemical processes it can be dissolved and purified, which some alchemists compared to purification processes the human body can undergo. Its symbol is a circle bisected by a horizontal line.
