Scientific Journals Impact Factors 2010

For example, if a journal has an IF of 3 in 2010, then its papers published in 2008 and 2009 received three citations each on an average in 2010. The 2010 IF of a journal is calculated as follows: $JIF\ 2010 = A/B$. where. A = the number of times the articles published in that journal in 2008 and 2009, were cited by articles in indexed journals during 2010.

Impact factor of a scientific journal: Is it a measure of ...

The 2010 impact factor is defined as the number of citations in 2010 to articles published in 2008 and 2009 divided by the number of articles published in 2008 and 2009. In this work, we estimated journal impact factors by taking into account only articles and reviews (both in the numerator and denominator of the impact factor formula).
