Erratum in Am J Sports Med. 2018 Oct;46(12):NP69-NP72. BACKGROUND: Ice hockey is a physically demanding sport where athletes are susceptible to a variety of injuries. Several studies reported the overall injury rates in ice hockey; however, there is a paucity of information on upper extremity (UE) injuries among collegiate ice hockey players.

**Epidemiology of Upper Extremity Injuries in NCAA Men's and ...**  
Upper extremity nerve entrapment syndromes are a difficult diagnosis for clinicians to make, usually due to their vague and variable symptoms. The exact incidence of entrapment neuropathies in sports is not well known, but the upper extremity accounts for greater than 80% of the total amount . Entrapment neuropathies can be acute and caused by trauma or chronic due to overuse or sport-specific risk factors.
